corporaldares asked:
Going to follow up on that severed leg, or let the guardsponies take care of it? Remember your tenth regeneration, severed limbs can cause... complications.
penalcode asked:
whose severed hoof did that belong to anyway?
Don't know, don't care, not my problem any more.

foreveryoursm asked:
Well you've got to hand it to her, she knows how to butter you up. Best get out of that universe before something else churns up though.
ask-venentus asked:
Doctor, can we please leave the punverse! This pony and her puns are giving me a migraine!!
I'm already way ahead of you, I'm parked on Titan in my own universe with a lovely view of Saturn.

shadownnico asked:
So... what did just happen?
stuffjacoblikes asked:
Doctor, what do you make of all the recent events with that bat-like pony?
I honestly don't know, I got dragged around and treated like crap, there was something about a scroll and a screwy timeline, and I'm just glad to be back here by myself.

demegordragovar asked:

its lovely how you have access to wine and butter but the more pressing matter is this. what is going on, and how did she know what you did to Derpy... you might need to silence her to protect twilight

darkcurlytops asked:

Is it a bit odd that she knows your interests?

The Puniverse is a bleeding universe, there are a number of ways she could have found out. Spying, gathering information from other ponies...

But I did
what she wanted,
she wont tell Twilight,
and we'll leave
it at that.

squeakthewritepony asked:
Hey Doc, doens't that mare you've been traveling with seem a bit...familiar? Just a little?
Maybe?
I don't know,
and I don't really
WANT to know.

modmikall asked:

So Doc, did you seriously go time jumping with a pony without so much as getting a name?

It always goes like that,
'hey, what's your name? I'm the Doctor!'
'Doctor who?'
And then we run around, have some kind of
bond by being on a first name basis, and bam,
off to time and space we go.
It's a nasty habit and I wont fall for it again!

... Also she was a bitch
so I didn't bother to ask.

originalcrazystrange asked:

You're quite easily persuaded, aren't you doctor?

flame6666 asked:

Geez, that mare really knows how to play you like a fiddle huh Doctor?

Shut up, I knew what I was doing!!!

Safaron-Unitic asked
See that doctor wasn't that a decent d version You he ped save a un verse didn't get hurt d dn't hurt peop e you wanted to help and you get rewarded with butter and booze Maybe you shou d be the companion more often
Whatever.
So I played taxi driver.
So what...?
I'll just stick to the festivals and avoid her.

grey matter asked
You know Doctor even if the butter thing is real PJ I mean that guard is just going to use you to save the universe over and over again right?
The deal was I wouldn't blacklist the universe, not that I'd play taxi every time there was a crisis.

theredparrot asked
Finally time and space are in good hooves again (Not yours obviously) How does it feels?
You know, it feels kind of good, actually.
I get to kick back and continue not caring.

infinite-scratch asked

I thought you were done with saving ponies lives and helping questionable organizations that are aware of your existence

But I didn't really DO anything!

I didn't do the saving,
I didn't get any blame,
hell, I wasn't even making
any helping efforts!

ask pon, sherlock asked
Doctor she just gave you something you really wanted to get you to come back. Doesn't that prove you are wanted, needed? That people appreciate you?

I doubt it.

No point in giving myself any false hopes.

I'm just an asset and a tool and that's that.

...Didn't even get a 'thank you'.

Do you seriously consider coming back to this universe every month?
Who said I wasn't allowed to get everything at once?

dark deer asked
So doc when this butter and wine festival?
m pony44 asked
So when is this butter festival?
When?!
You really just asked
a time traveler 'when'?
Hahahaha!!

So Doctor what are you gonna do with al that butter and wine?
Oh, I was thinking of decorating the walls, maybe make some new furniture with it-

EAT IT OF COURSE! WHAT DID YOU THINK?!
How's the wine and delicious butter?
Just smear that butter all over you or face you earned it

beltero'deader asked
So You gave up peaceful isolation and freedom of heartbreaking responsibilities For butter FOR BUTTER
WORTH IT!

Don't get me wrong Doctor, I like butter as much as the next filly but damn you're manipulated pretty easily Says something about the whole grey thing doesn't it?
So guess butter and wine can make even a migraine inducing universe seem more enjoyable huh? I'm surprised you caved in quickly Doc
Really? You're going to go to a universe that has caused you that much pain for this? I mean butter is good, but is it worth that?
Aahh shut up, it wasn't that bad. Just annoying. And the butter really makes up for it.

totally-not-lightning-dust asked
Look at you, Doctor. You've sold yourself out
ashredrage asked
All that for butter, Doctor? REALLY?

Wow, Doctor, what a cheap little whore you are. For butter and wine. Really?
Can't I enjoy myself for just FIVE measly minutes!?

A butter AND wine festival? All for you? Who wou dn't take that offer???
I'll drink to that!
Pop!

Oh god doctor I know you love butter and Wine but you've come so far don t do t What would Ananta think
the.meravelingshadow asked
So Ananta has the doctor's drinking problem gotten any better?
PAP!

Your time with Anata was interrupted ^^ Are you going to do anything else with her?
Sorry, I almost forgot...

Ten losses

too good at this...

mrbum asked
So going back to do noth ng in te TARDIS again or are yoJ gonna actually search for that myst cal force that its play ng whack a mo e with the universe?
Oh come on, can't I take a break first? That detour was exhausting!

s[illegible]asked
So about that source of the dimensional holes that we were dealing with earlier You cannot fix it, fine But is there a way to contain it? Stop it from spreading? A bit like using scissors to cut off a torn portion so that the weakened and frayed paper does not stretch further
That's what I did already, that universe is fine for now. The rest is up to them. Not my universe, not my problem, but Twilight was involved so... I helped a little bit.

So now that all those shenanigans are out of the way, should you go check on your Twilight? Or perhaps finish that movie with Ananta? Then again, if I remember correctly, you also landed in this universe to begin with, so maybe try to get closer to that anomaly? Choices, choices...
We're going to finish our movie and that's that!

ask-straight-razor asked

So good Doctor it seems you've had to go on more adventures despite your desire to stay out of such things Will you return to your moping and festering now that you're alone? Or perhaps you feel stir crazy, feel the need to go out and do it all again? Oh who am I kidding Of course you're just going to sit and rot in that blue box of yours It's what you've always done and it's what you'll always do

Wel that was an adventure! And what a reward to boot! But it had to have felt at east a ittle good to be help ng others again eh?
Wh- n-no!
I mean...!
The reward was fine,
but I don't care what
happens to the
Puniverse!

so doctor what do you th nk of changel ngs?
Oh I could go on for hours about my adventures with changelings--

I-I mean- they were nothing but troublesome love leeching little pests!
Wasting my time and stuff...
Dumb fairies.

Welp looks like that escapade was well worth it! But come on you had a little fun, right?
... Maybe...
Maybe just a little...

Doctor Why do you st l trave n your tardis? If yoJ rea ly wanted to avo d adventure wouldn t it be better to settle down and l ve in one p ace for awhi e? Away from all the t me and space shenanigans?
The TARDIS is my home, and it's where I'll stay...

grace essnooues asked
Doctor do you think that going exploring again with somepony cheer you up?
No, that would just make everything worse!

phil_pfga asked
You sure missed adventuring huh? How about you go find some companions and travel once more?
I-I'm not going to put myself through that again!

Stania asked
So Doctor maybe you want to visit your Twilight now?
diddle-bug asked
Weren't you on your way to visit Twilight? You should probably go do that before you get sidetracked
... Twilight...
I can't keep doing this to her...

darkpon magic asked
Forgive me for asking Doctor but shou dn't you focus on maybe try ng to remember what you had forgotten before you were dragged onto this trip?
... Did I forget something...?

dann j nter asked
So how did it feel to be adventuring again after al th s time? Admit t You did miss t slightly on some level didn't you?
No-!
Maybe-!
I mean there was a little bit of a thrill to it but--

hyruletriuga masked
Thanks for the help not just what we know of but the countless times you've saved lives

Alright I guess it wouldn't hurt to explore a LITTLE bit...!

Nothing big though.

Hmm, too tacky...?

You need to get friends or something
Excuse me,
I have a friend.
My TARDIS is
friend enough.
Hmph.

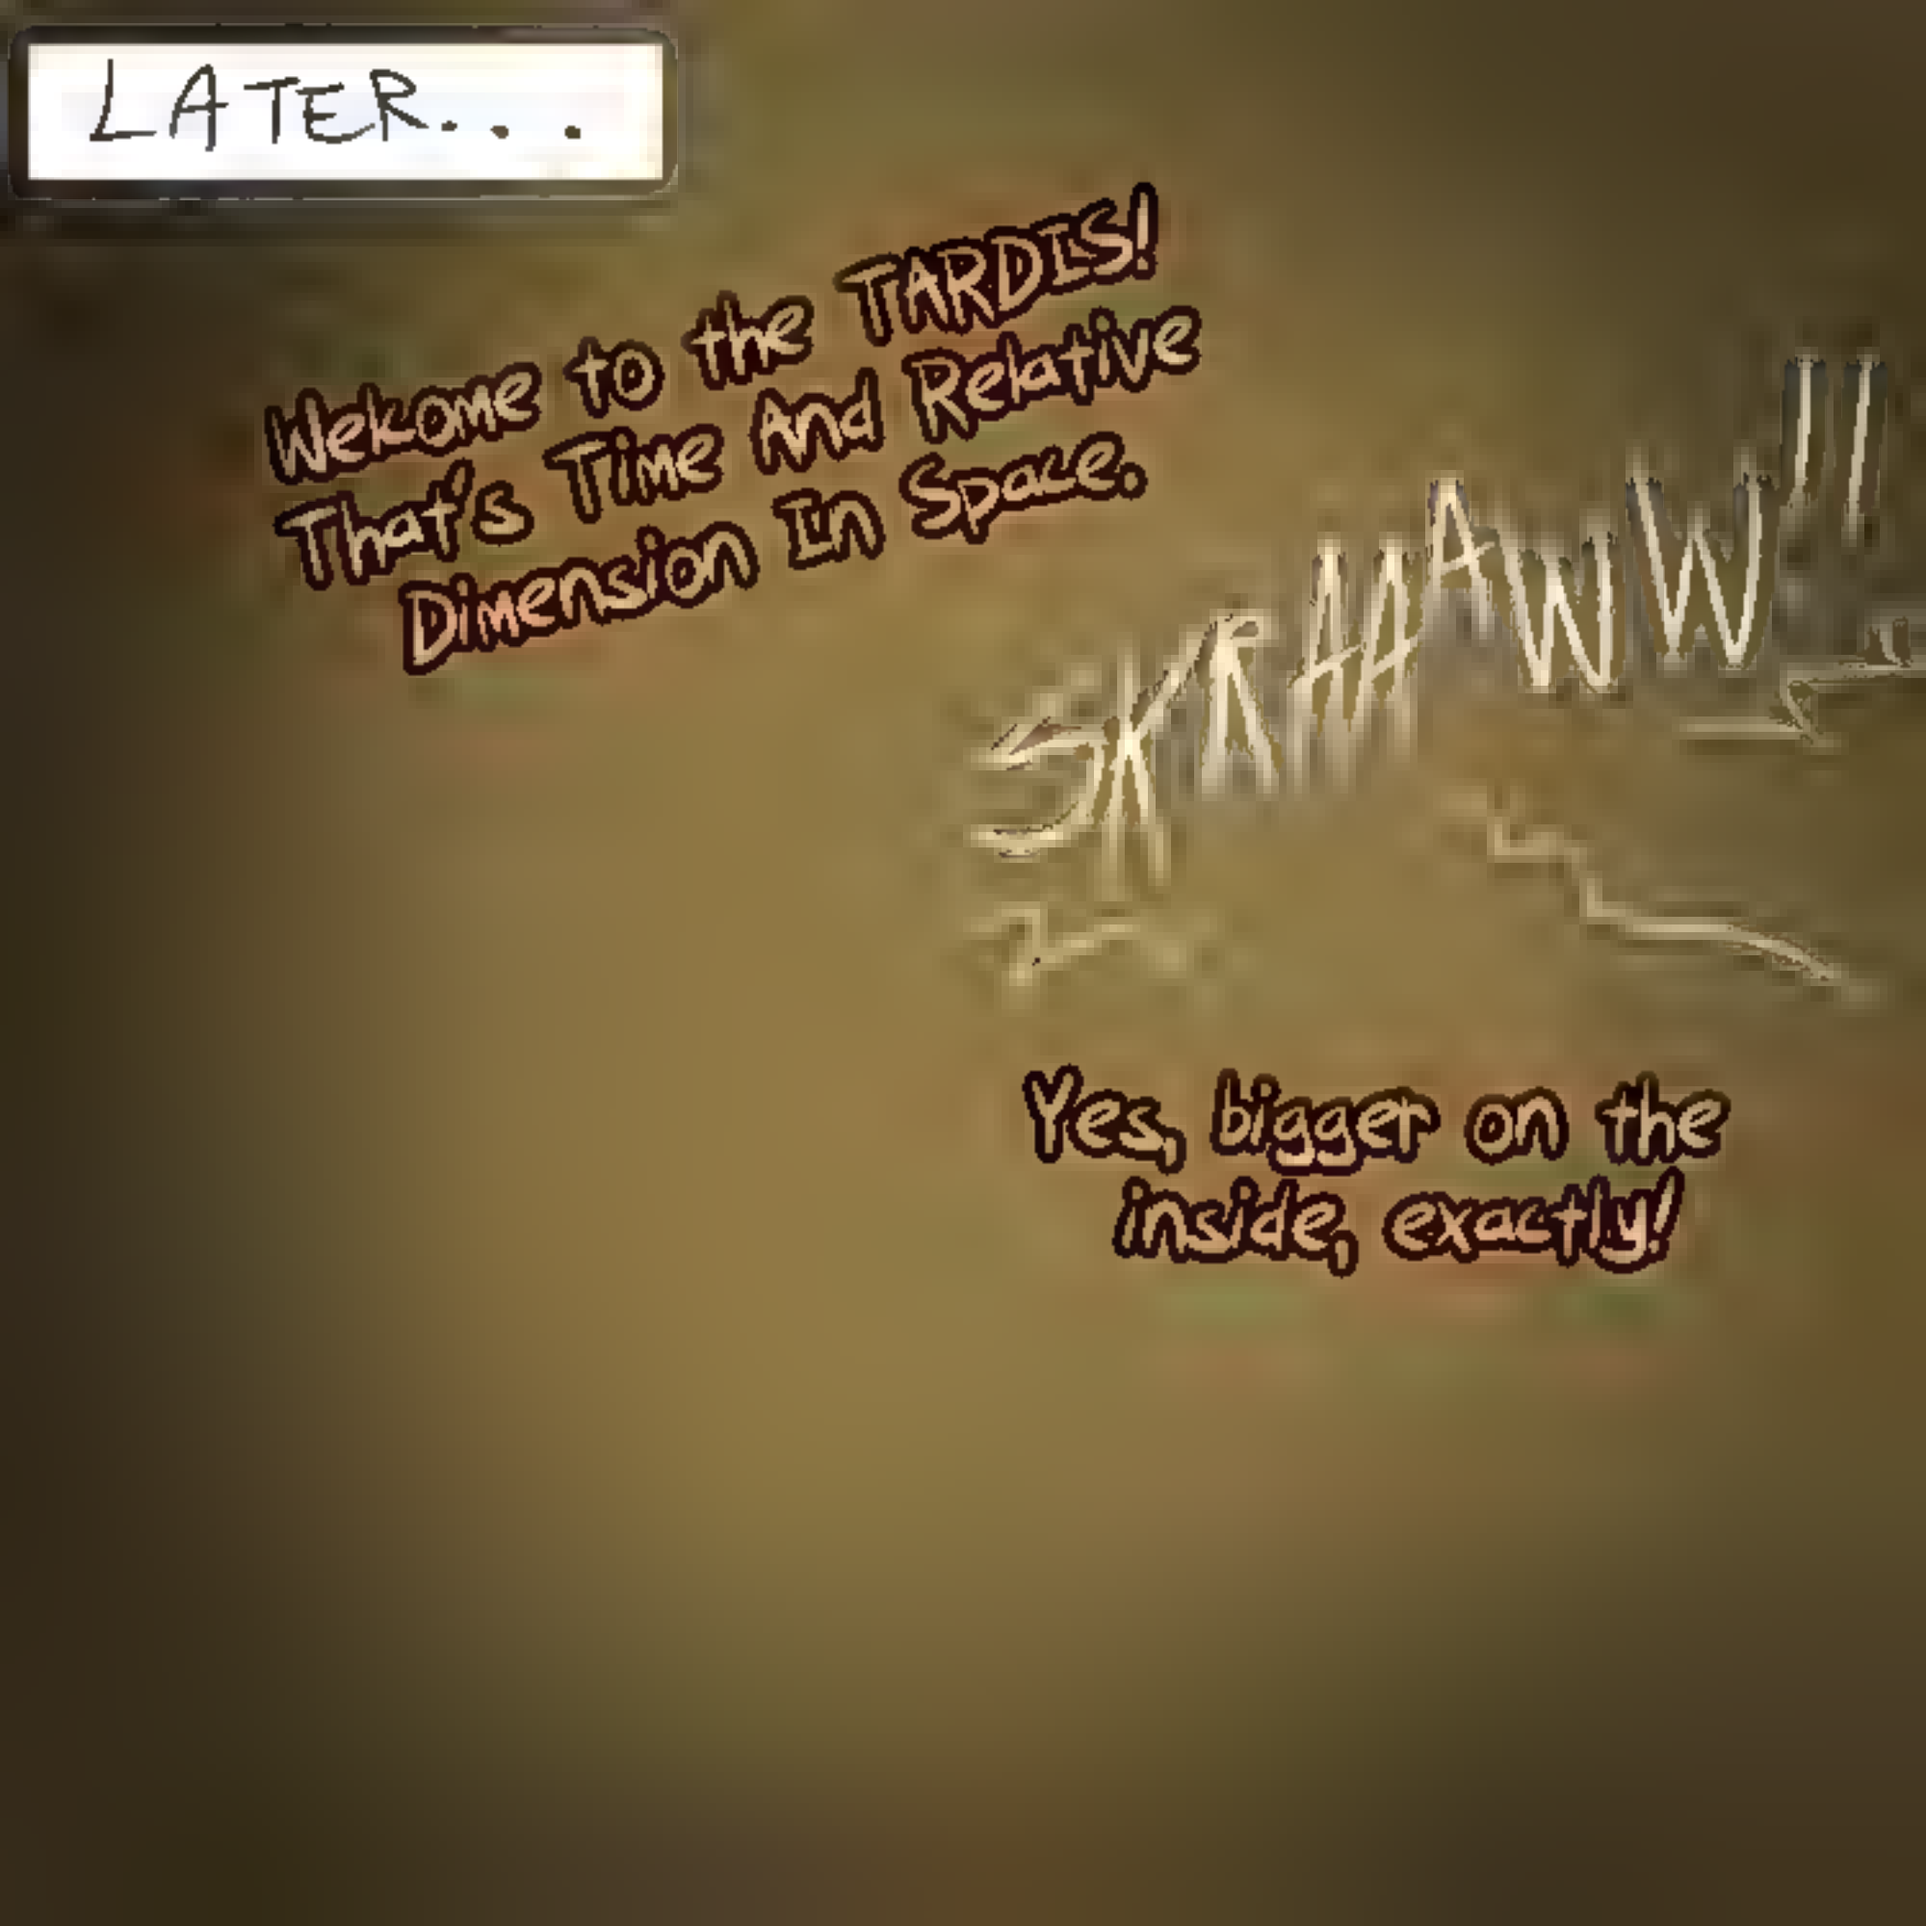
What about your new companion. Is Clara involved in this? If she is, is she safe with all the murders going around?
..Who?

What of the impossible mare?
Phhht.
All mares
are impossible.

Run you clever boy
Isn't that what I'm doing?

sebazu asked
Do you think having a companion around strong enough to handle you when you are having an episode would be a good idea?
Hah, yeah right. I'd need a companion who's not only strong, but they wont nag, wont judge, and wont complain.

Hold that thought!



LATER...
Wekome to the TARDIS! That's Time And Relative Dimension In Space.
SKRAAAWW!!
Yes, bigger on the inside, exactly!

ask the eyeless one
Doctor Instead of sitting there like N' ass. Get up, Find Yourself a new Companion and DO something
Say hello to Vivian, my new companion.
SKREEE!!!
She's delighted to meet you.

When did you learn raptor doctor I am intrigued
Where d d you learn to speak such a useful language like Raptor?
I can speak over five billion languages, you know.

ask-zamb.e asked
Awl She's adorable! But f you can speak raptor then it must be a language
And if t's a language shouldn't the TARDIS be translating t to us?
Mm, you see, the TARDIS translates languages that are spoken with words. I can speak cat and baby and they don't translate, for example. I guess 'speak' is not the right term.

'Communicate' is a better word.
If it can project thought then I can communicate with it in a telepathic manner.
Now, are you ready for adventure, Vivian?
SHREE

asscryofa...emlp asked

Wait a m nute If your new companion s a Raptor and I know she is that means she's a carn vore And being a herbivore how are you gonna feed her? Last checked Pon es don't have beef or steaks on their menus

ask-lofty-dreams asked

Great you found a new companion! But is a carnivore that actively hunts its own food such a good idea?

Okay, rule one.
Ask questions first before you eat it.
Even if it doesn't look sentient you
never know unless you ask first.

joeywaggoner asked

Doctor won't ponies panic when they see your new dinosaur friend there? mean call me crazy but she looks a little bit out of place in Equestria

Doctor usually you and your companion tend to blend in to the time and place you're at I seriously doubt you can just bring a raptor along with you and have nobody care or ask questions
SKREEEE!
No, we're not going back for dessert, this is the 4th time we've been banned from an ENTIRE planet...!

cheese-ninja asked

There is no way Anata is going to agree to that

cl cahano asked

What is Anata going to think about your new companion Vivian huu?

statnampen asked
Doctor I really don't think you can handle looking after a Velociraptor No offence but Time and Space is one thing a Velociraptor is something completely different Also they eat meat and I have been informed that horse is quite tasty
GASP
Says the guy who called a deinonychus a velociraptor! You know, it's rude to mis-classify a dinosaur!

Ok now that, thaaat is out of the way and your detest for companions has been amplified. What will you do now? Get drunk, sleep the day off, spend the day with Anata, or travel. Good luck with any other attempts at some resemblance of the past.

Wow Doctor, you lost another companion. So, are you gonna find a new companion or are you gonna try and to get drunk and eat tons of butter?

So what's your next "crazy" adventure, or are you just going to turn back to butter and booze?

So that's all I've become to you. no hope for me. Just going to fail again and again and booze it up.

That's me now, isn't it?

ask-elen asked
Doctor what are you afraid of?
I'm afraid... that I can't be the Doctor you all want... I just wanted-- I wanted to try again and- I forgot how...

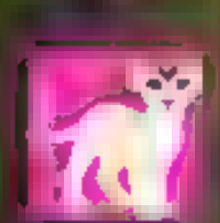
Don t listen to the neigh-sayers. The important thing is that you're TRYING. You are not perfect. you mess up sometimes, but you're still trying. So many people forget the importance of that. They think that because they can't get it right every time, they should settle for a lower bar. lower standards. What matters is that no matter how many times you blow it, it's that you get up one more time. Success is trying one more time than you failed

Baby steps, Doctor. The fact that that you tried shows that you're closer than you were when you were first pelted with our inane blatherings

aww. do not be sorry doctor. you're trying. and that's what matters. Don't give up just because you didn't succeed



It's ok, Doc. You've made mistakes, but that's all they are. mistakes. You're trying, and that's what matters. No-one's perfect, and nobody expects you to be. You may fail, but the important part is getting up, dusting off, and learning from t

Just the fact that you tried proves that you can be, no proves that you ARE the doctor we want to see!

Doctor, what matters is you tried. That's more than enough for us to know your still with us

So, whose gonna be the lucky one? Who's your new companion??

Hallochka15 said

Doctor, how's the process of picking a companion going to be exactly?

Obviously not well..

Uuughh...
This is hopeless...

Doctor if you are looking for a companion you don't have to look far we can be your companion I mean I know we are just voices or words but I'm pretty sure that you can ring up a way for use to be more interactive and you don't have to worry about us getting hurt cause we are just text plus we have always been here since the beginning and we are not going anywhere So Doctor what do you say give us a chance?
....You....

Of course, why didn't I see it before...?
This whole time...
This whole time it's always been all of you...
Haha...
I'm an idiot!

So where to next. All of time and space, planets of the the most amaz ng th ngs some ponies have never seen and others which some w sh to forget, some that exist in legend. All having secrets of there own. So where f rst?
First step is, the adventure! Next stop, everywhere! Someplace to discover more and be the same Doctor you are and a ways will be! Where should we go Doctor?
I don't know, you tell me!
You're my companions after all!

askstarryhue asked

Whatever happened to your plans to woe Octavia?

You should check on a old friend or two maybe the Master, to see how he's doing. Oh I know lets go see Octavia That sounds like a brilliant idea!
Oh right.
She was having tea with the Master. Nooo thank you.

Hm?
I only went to the gardens once and landed in the wrong universe.
Happens a lot.

Did you ever find out why the Tardis didn't want to go to Canterlot? I've been wanting to ask for a while but the ask box has never been open for me
No, and she still doesn't seem to want to go there. Yet another reason Octavia isn't an option any more.

I also have a question for you... Is Equestria the ponyverse equivalent of Earth? Or perhaps it's isolated on it's own ecosystem and ecology? You mentioned Saturn which makes me believe it's the former
Equus has many striking similarities to Earth, so it would be safe to assume it's an alternate Earth. Same place in the solar system, same planets. Just different names.

It began and evolved much like Earth, except that the dominant species were equine and magical energy was the driving force behind everything.

Hey Doctor, why did you ignore the gaps and holes in the universe? Given what they did to Amy and Rory and to you I wouldn't have thought that you'd just leave them alone Those things are dangerous and the things they bring are dangerous. Already you've got the Master Jack. Patience and a fleet of daleks that came through How many more have to get stranded here before you go do something about it?

Do you understand how dead scared I am of the things going wrong in my universe? I don't even know where to start...

Wow, that's a name I haven't heard in a while. But no, no that's not it. Time "wrong-ness" always makes me feel sick, it's a timesense. Like a really bad smell. But with time.

Hey Doc do you think it's possible that a form of magic is causing the holes in the universes I mean we know magic can do a lot, but could it do all that
There has to be a cause to this... Powerful magic or something worse..
They were hidden right in plain sight, woven in to this reality so well that I couldn't even sense them until I looked right at them...

Doctor I th nk you shou d leave Twilight's 'friends' a one for now We l, there are only 2 left anyway
Just how much has changed in this universe without my realizing...?

Maybe you could see if anyone in particular is behind all these things in Ponyville?
I wouldn't even know where to begin...
I don't think any 'one' would be capable of something this massive...

Maybe you should v sit Twilight
A lot of this does seem to be surrounding her friends, but should I really put more on her shoulders than she's already had to deal with...?

Doctor what ever happened to the murders in ponyville? it's been a while since you have heard anything from twilight
The murders are miniscule in comparison to everything else happening around here. By now, the murders are happening elsewhere. They aren't my problem.

Plus, Twilight's taking care of a baby right now, of course I'm not going to hear a lot from her...

It's...
It's you!
What—?

Wait, you're Twilight's brother... Shining Armor...?

Doctor...

Twily is always talking
about you in her letters,
and I know you care for her...

...Considering you kidnapped me from my wife out of nowhere to talk to her a while back.

I try to talk with her as best I can but I just can't reach her.

I finally managed to get some time away from the war to come see her again, but nothing I say is changing her mind.

If she wont listen to her brother then maybe-
Maybe she'd be willing to listen to her lover!
O-oh uh-
It's really not-
uhm-

Please, if you could just talk to her, the kingdom needs her again!

She doesn't think she's worthy of being a princess any more but with her knowledge and wisdom she could really be the one to turn this whole thing around.

Just... Please...
Try to see if you
can convince her to
reclaim her throne...

That's all I ask.

Why isn't Twilight a Princess anymore? Did she chop off her wings?
...Princess...?

wait, doctor did you not know that twilight turned into a princess?
Wait a minute...
I DID know she was supposed to be a princess eventually...
But somehow it slipped my mind.
I didn't realize it already happened to her.

Well doctor while you were off not caring n your Tardis, twi ght got wings a castle , and was entit ed pnncess of friendsh p just so you know
But she didn't make any implications at all! Just how much has time been altered?

I forgot that Twilight was a Princess maybe not in your universe though I think
Did another universe bleed through and she became a princess at one point or
was she a princess before the whole "bleeding through universes" happened?
No, this is the same universe, it's the same Twilight.
I even attended her coronation a long time ago, before I even knew her, back when I was still adventuring...

What's wrong Doctor? you look kinda shaken up that Twilight's a princess now
I should have remembered something like that, but it just went over my head this whole time.
It didn't even occur to me!
Why?

Go check on Twilight locking herself in the library doesn't sound so good
The Princess of Friendship...
She must have given up her throne and her wings after losing her friends...

Doctor everything seems to be revolving around twilight It might be best to check on her And Maybe get a new history lesson on how things have developed in this universe
This universe's timeline has been so scrambled up that my head can barely even comprehend it. All these changes are tucked around the corner of my thoughts.

Oh Goddamnit more time lines b eed ng through Seems Ike you ought to go see M ss Sparkle and ask her 'bout that war Sh n ng Armor mentioned I hope she's okay
Is it time to pay Tw light a qu ck v s t? E verypony else n th s town s e ther dead or wants to kill you

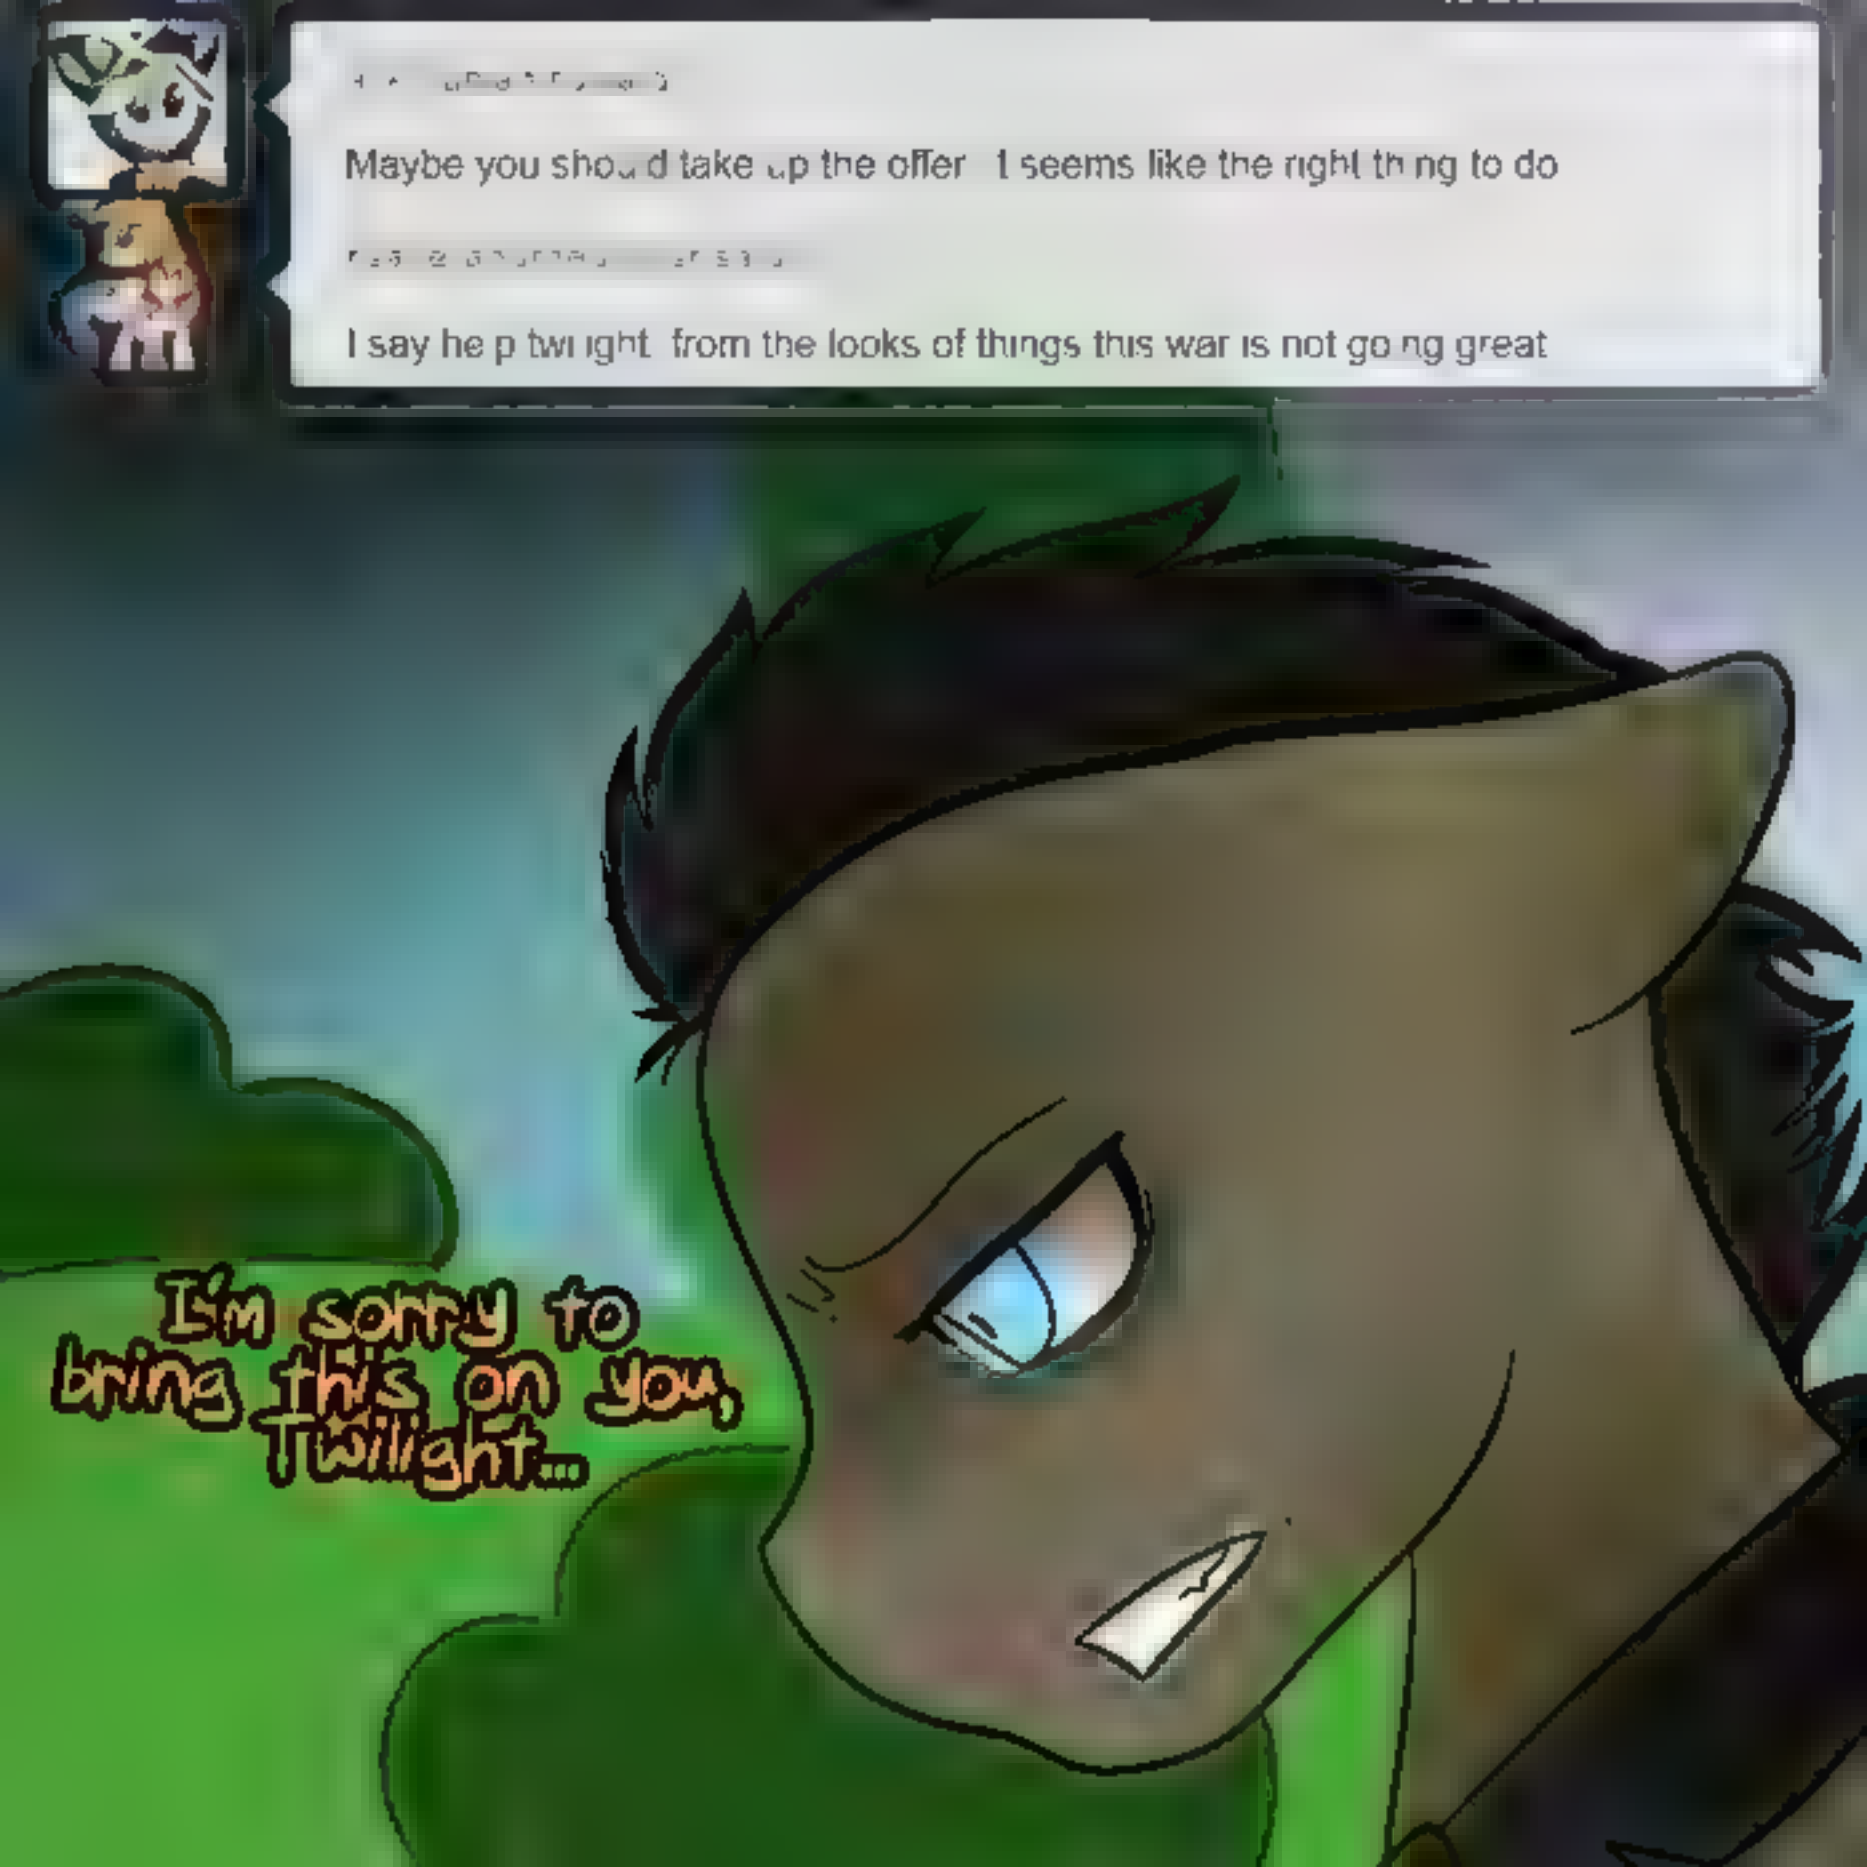
I need to see her again.
I need answers.



Maybe you shou d take up the offer I seems like the right th ng to do
I say he p twi ight from the looks of things this war is not go ng great
I'm sorry to bring this on you, Twilight...

How long has it been since you've seen Twilight?
You haven't seen twilight in a while I hope shes alright
It shouldn't have been that long for her, weeks maybe, at most...

Me. Strength. What a joke.
Knock knock on Twilight's door
KNock

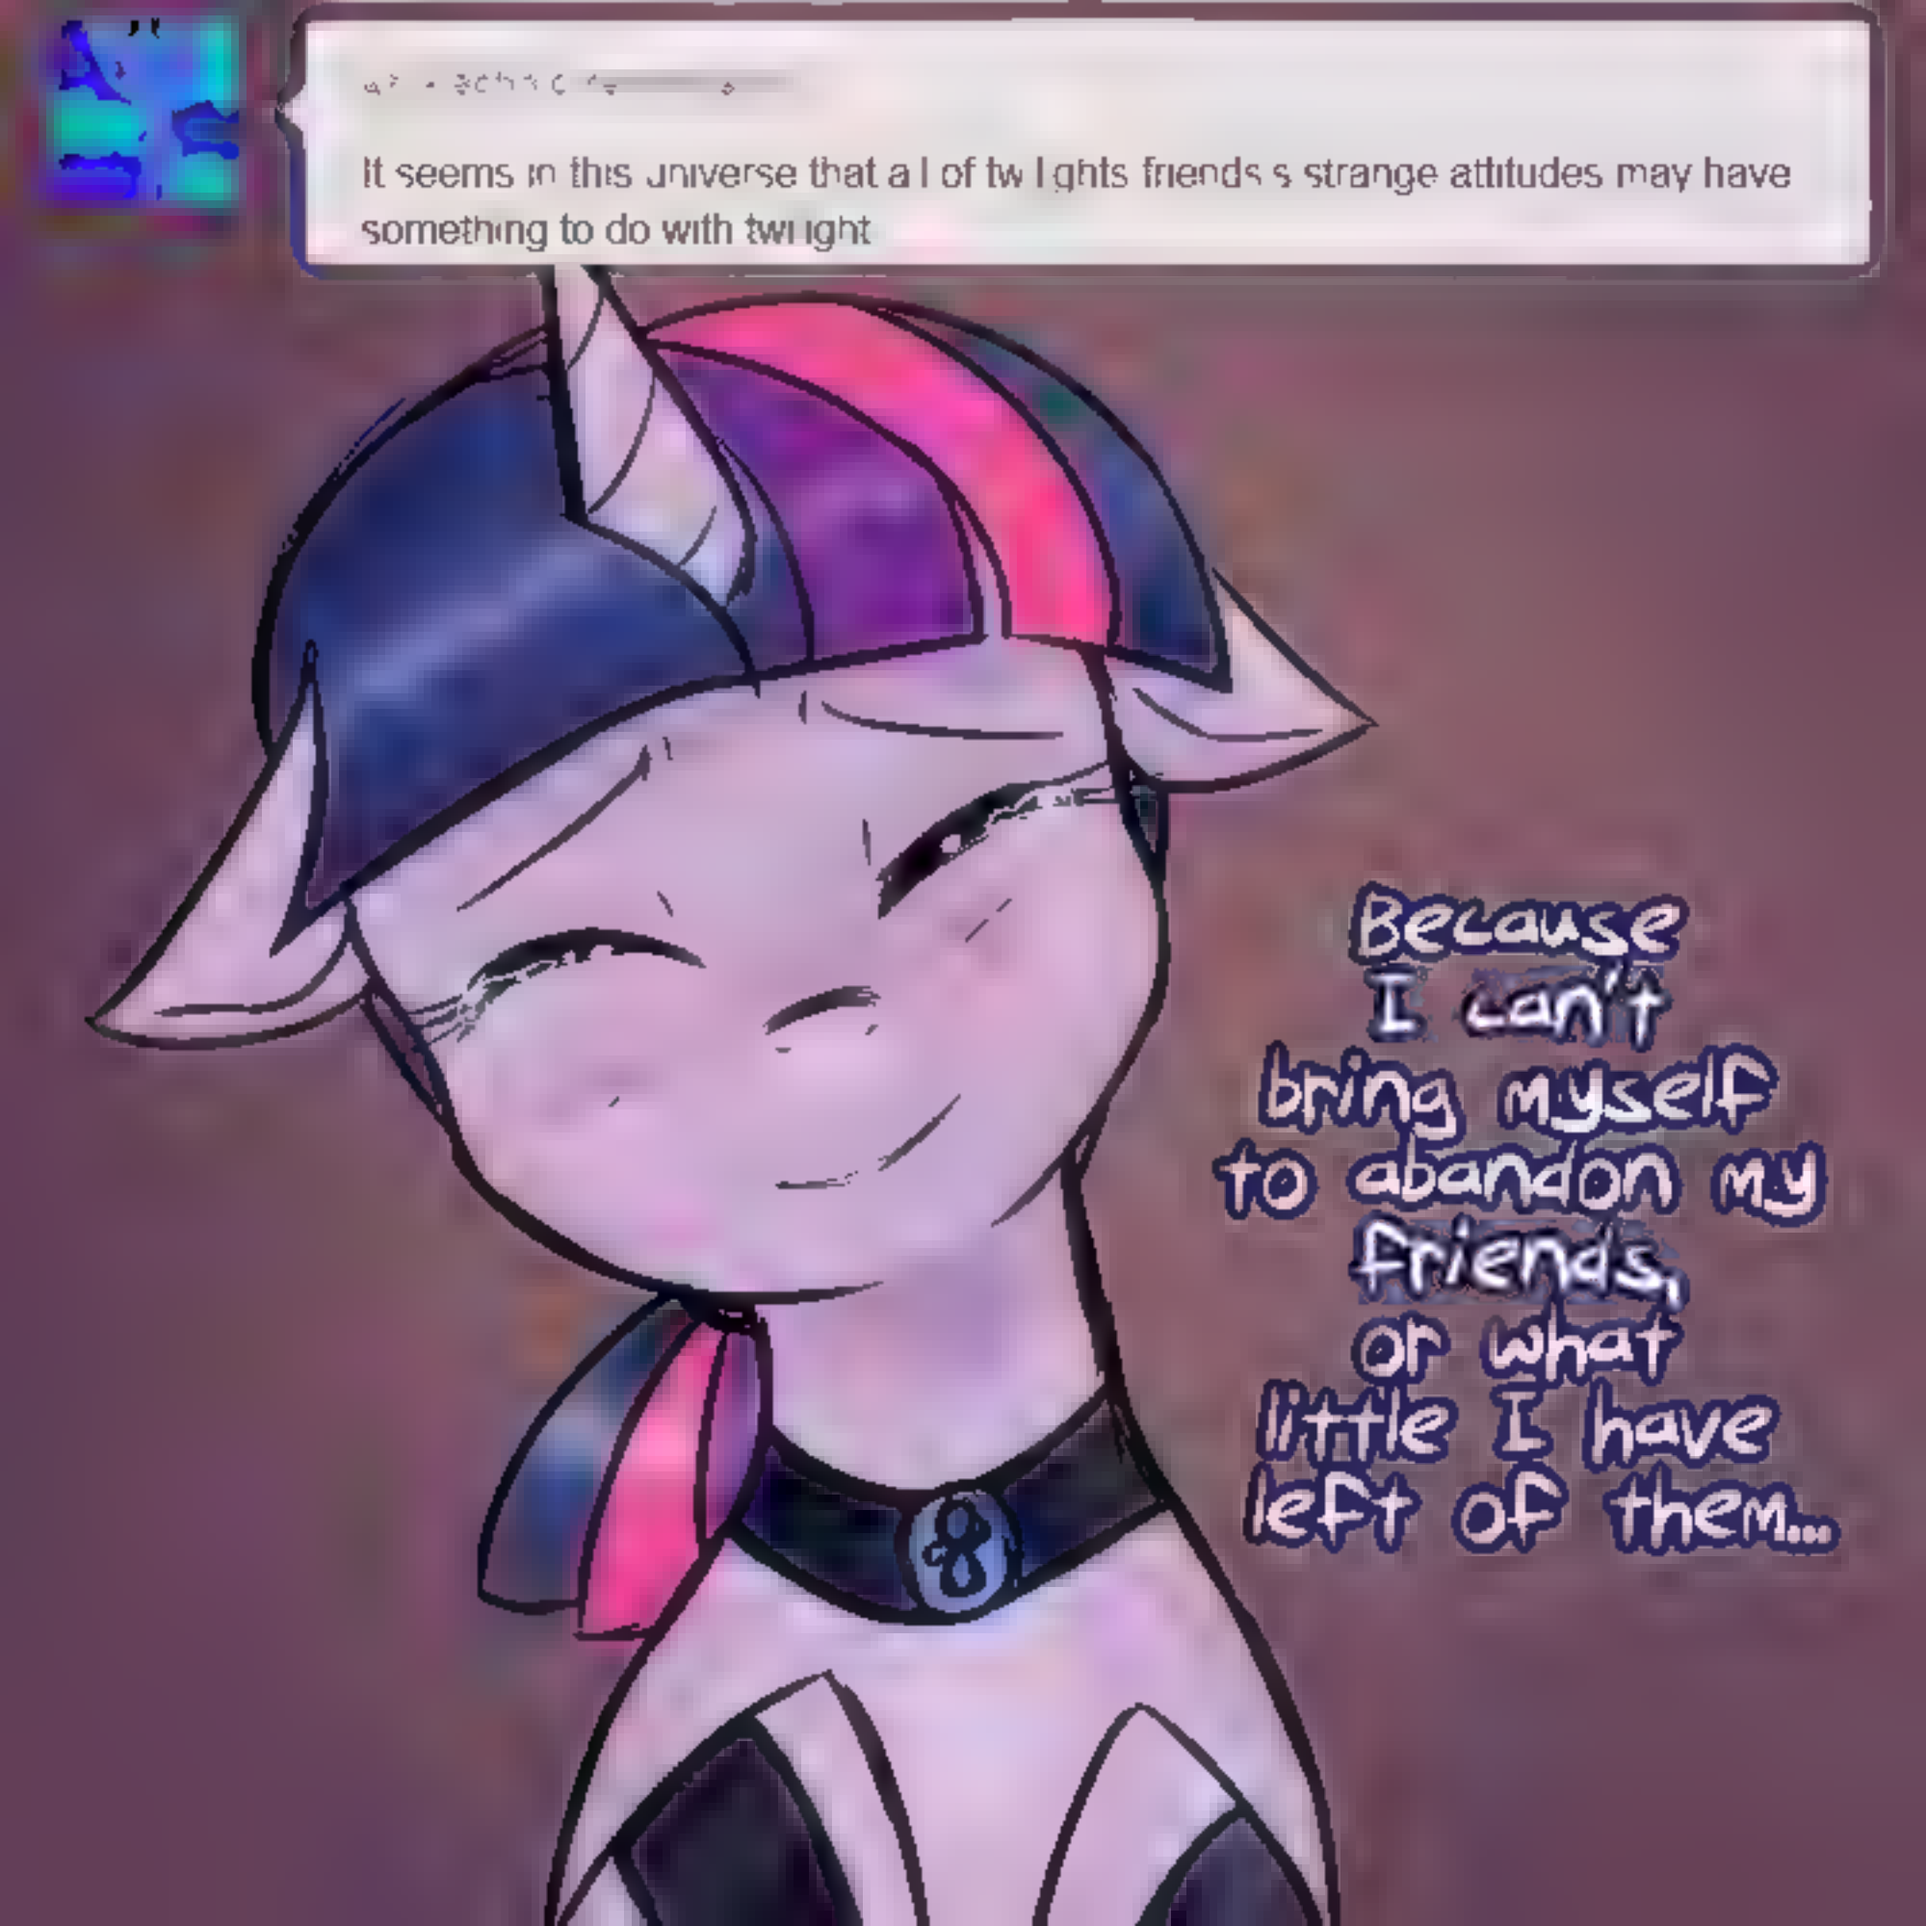
Feeling compassion again? Let's hope twilight isn't too upset at you being gone all this time
Doctor! I missed you, I'm so glad you're okay, I was worried...
It's... Nice to see you too...

Well ask Twilight if she's a princess then? Maybe she'll listen to you
Doctor ask Twilight why she left the throne! Why did she abandon her fellow ponies? And what happened to Ponyville?
I... Noticed the town isn't doing so well... Is everything alright? Are you safe...
How's Lightning Blitz doing?

It sounds like twilight still thinks highly of you doctor. Maybe you can help each other
Of course I'm safe. You promised to protect me.

Think of it this way. If you don't help her, who will?
Still, with the state of things out there... Why haven't you moved out of town yet...?



It seems in this universe that all of twilights friends's strange attitudes may have something to do with twilight
Because I can't bring myself to abandon my friends, or what little I have left of them...

Are you really sure you want to make Twilight relive those memories? I know you need answers, but is it worth hurting her like that?
Applejack and Rarity are the only ones left, I can't leave them. I wouldn't be able to forgive myself if I did, and I almost messed up twice.

You know Twilight wants to help Don't deprive her of the choice
Rarity might wake up from her coma, after all. And I... I'm sure Applejack will need some time but she'll come around, we're all hurting from Rainbow's death but I think it hit her the hardest...

Doctor please don't rush Twilight into getting involved in this war. Remember how it felt that after you saw the Truth a lot of people just criticized you for not going out and being a hero instead of helping you. Remember how good it felt when you were supported instead? Have her help only if she wants to but otherwise just be there for her like we your companions are for you
And- then there's Fluttershy! She went missing, we don't know if she's alive or not but th-there's still a chance she'll come back too! I just can't give up on them, not after they showed me how wonderful friends could be! I can't!
...I understand... I'm sorry...

Maybe talking to Twi isn't a bad thing. She can give you some more insight on what's going on this universe
I need to be gentle..
The last time I was here, Ponyville wasn't in nearly such a mess...
What's been going on...?

Hey Doctor what do you th nk Sh ny meant when he sa d there is a war go ng on
It's not just Ponyville. Lots of small towns are suffering right now. Even the cities are starting to get hit.
It's because of the shortage in crops, in the northern areas it's especially bad. It's all because of this war...

I don t reca l any war from your previous visits to Ponyv l e maybe it's a good dea to look into that whi e you're here
...I really have been out of touch, I never heard about a war until now.
No, you wouldn't have, Celestia made sure most civilians wouldn't be aware of it. There's been no official deceleration of war. In fact, even I wasn't aware of it until I became a Princess.

Doc: if you do mention this whole princess thing to Twilight maybe you should try to be more careful odds are with all of the events that lead up to her giving it up it's probably a really sensitive subject for her tread lightly

This is it

How... Long ago was that? You being titled princess I mean, and the war, what started it...?

It began as threat letters from the Diamond Dog emperor two years ago. The threats weren't taken seriously until six months later the crops in the north stopped growing.

Diamond Dogs aren't exactly known for tactical intelligence, but somehow they discovered they could use their resources in salt to sabotage Equestria's farmlands.

It wasn't until about a year in that I became a Princess and was made aware of it.

Bring the questions down gently to Twilight. You don't want to upset her than she already is
And... Since then...?
It seems the Diamond Dogs are demanding our gem rich lands, Equestria is abundant in them and they want all of it for themselves.

I was informed that the northern borders were a war zone, ponies were being captured, entire provinces blocked off to keep them safe. The Princesses said I might be needed for negotiations and strategies...
It was... Really overwhelming for me.

When you go talk with twilight you might want to be subtle we don't want her thinking you are forcing into this
So then you... Gave up the throne...? ...Because of the war?
I feel sorry for asking her these things

I was ready to take whatever responsibility I needed to.

I was nervous, a little lost, but I could have handled anything...

...As long as I had my friends by my side...

How long has it been since Twilight gave up the throne? How long have you been gone, Doc?
It was about three months after I was crowned when it happened...
I was recovering from a recent adventure and everything seemed to be alright.

But then.. That's when ponies started going missing in Ponyville.
We had no idea what to make of it.

Wait did twilight give up her wings? Where are the other princesses?
My.. My wings suddenly disappeared one day..
I tried to gather my friends to make sure all of them were safe and that's when we discovered that..
Pinkie killed Rainbow..

... After everything fell apart I just... Couldn't go back to the throne. I know my brother and the other princesses say the kingdom needs me but... But...

I'm supposed to be the princess of friendship..! They were the reason I got so far, they were what gave me my strength and wisdom!

Do you think she's too far gone to reclaim the throne? If she truly is the only hope things could take a turn for the worse if she chooses not to
If I couldn't even protect my dearest friends how could I possibly care for an entire kingdom?!

What do you plan to do? Do you think you can talk sense to Twilight?

Since Time is jumbled it must have taken a big toll on Princess Twilight. You might want to take it easier on her considering she had go through a lot without there to help her
It's alright. You do what you think is best. I'll support whatever choice you make, because I promised I would protect you.

I need to go now.
I'm... I'm going to look
in to this, alright?
Something isn't right and
I'm going to find
out what it is.
Doctor-!

Please, don't feel like you have to push yourself for my sake... Okay...?
Of course not...

Doctor has it occurred to you that maybe the reason you didn't notice Twilight becoming an alicorn is because you're too caught up in the timeline to notice any changes to it from outside sources? If you've become part of the chain of events wouldn't that stop you from getting any information that might change things?

...That could explain why all these changes feel fixed.

But then... What if this is my fault somehow?

I have this heavy feeling I can't shake off...

Doctor is there a way to prevent this war? I know you don't care about the other ponies but for Twilight's safety?
No way. It's been going on far too long for me to interfere. Plus it can't be that bad if most of Equestria still doesn't know about it, right?

Poor Twilight Doctor. I know it's difficult but I think your memory is being messed with if you missed the bit about twilight being royalty. Oversights like that are not typical of you. You may be affected by all this. We have faith that you will figure it out so please keep trying. We are behind you

Shouldn't you be concerned why you forgot such an important fact like Twilight being a princess?

... I don't know...
My memory has always had issues in this life, from when I first regenerated here.
Gaps missing, details fuzzy...
It bothers me but what can I do...?

Doesn't it seem strange that all the bleeding realities are converging on your Marshmallow's world?
It's mine as well...! My Ponyville was never like this, and yet now it is...! Why? Why didn't I see it? What's causing all of this...?!

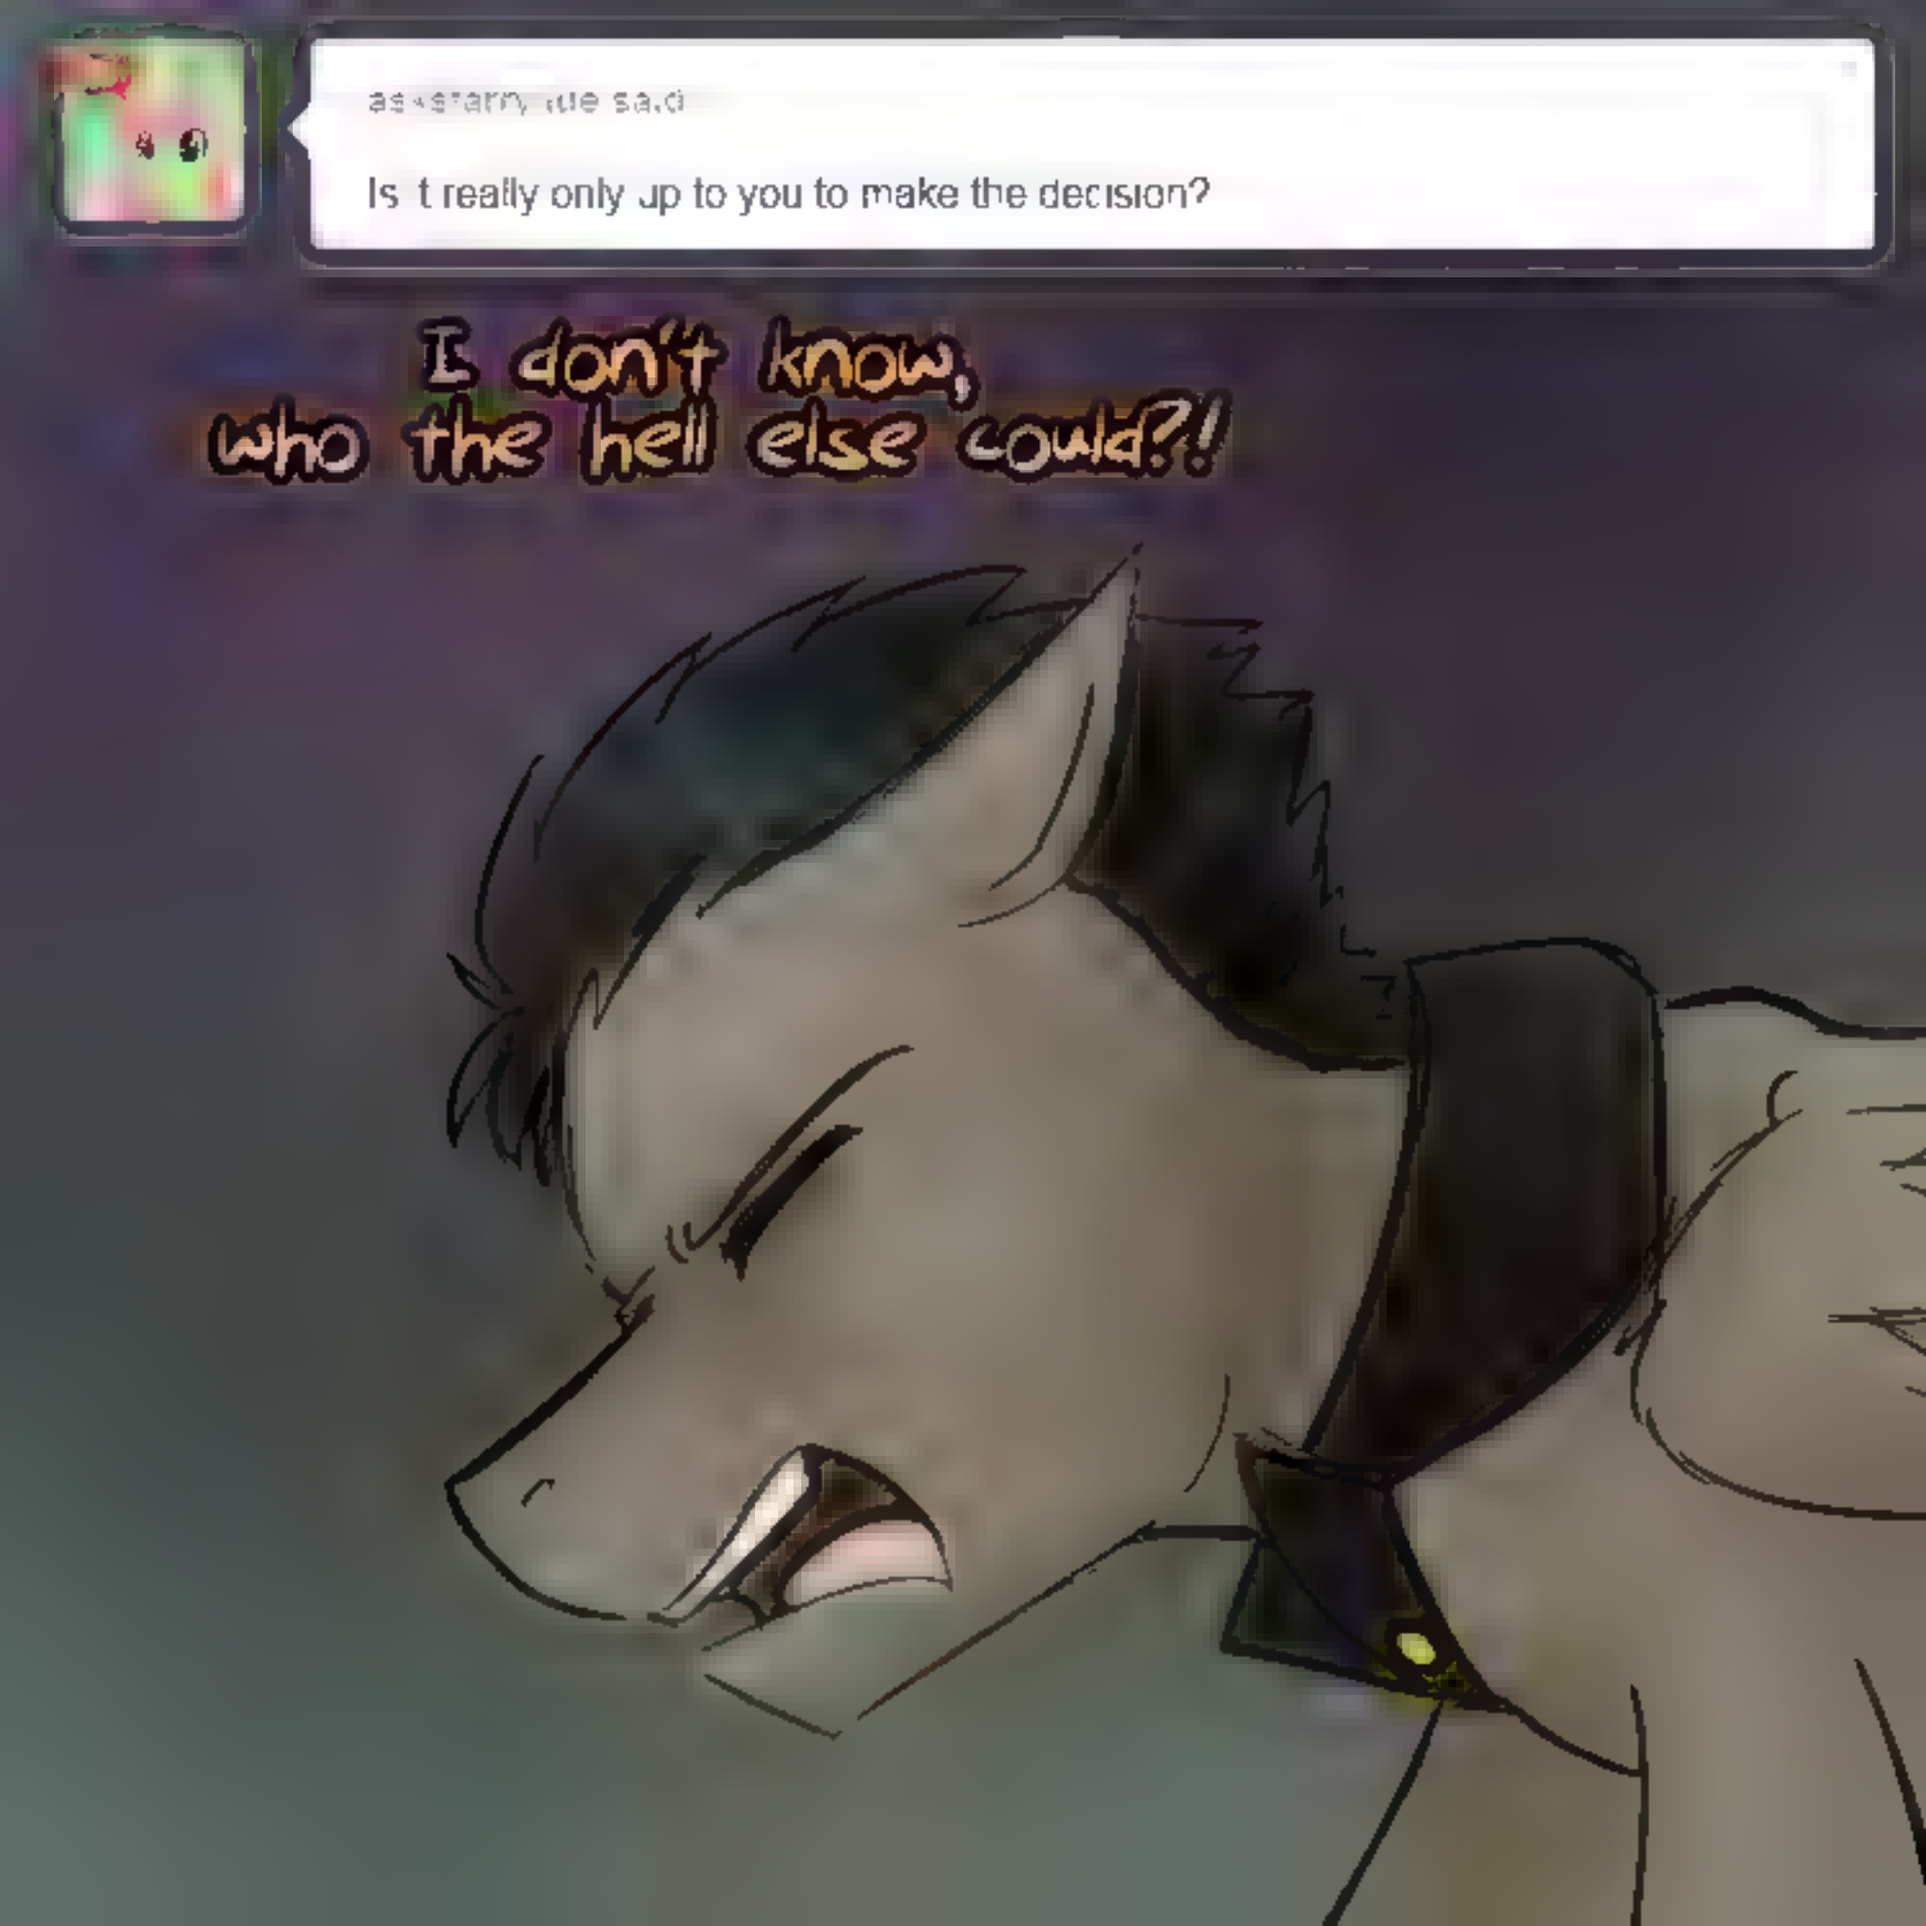
I only said 'mine' in reference to it being the universe I'm most familiar with...
Get off it.

Oh my my dear Doctor, whatever shall you do? Let your love rot away in this land that quickly turns to hell? Or save her but in the process lose her? Either way, you lose her lose one of the only things you seem to cherish in this pitiful existence of yours isn't that fun?



Is t really only up to you to make the decision?
I don't know,
who the hell else could?!

Doctor, maybe I shouldn't ask this but perhaps it's time to consult the Master about all these changes in reality He is after all, a time lord like you
Doctor snap out of it!! There could be an possibility to keep her and the universe!! There's always some kind of loop hole in the contract, so to speak, and if that's the case, then there might be still hope for your twilight and the ponyville you once knew!! All you need to do is to find someone to help you with- that's it!! The Master!! He has an Tardis too!! Maybe if you did some serious timey Wimey stuff you both can save the universe and twilight!!
After what that bastard did to Twilight?! Are you bloody insane?!?
I'D SOONER KILL HIM THAN EVER ASK HIM FOR HELP!!!

Come on Doctor t can't be that cut-and-dry! Nothing Timey-Wimey ever is! Isn't there some way to I don't know separate her from the timeline before you fix it or something? Maybe bring her into the TARDIS for the final event (whatever and whenever that happens to be)?
Perhaps you ought to consider take Twilight for a trip through time Time travelers are immune to cosmic retcons so she'll still exist if you fix everything
It wont work. If the world is rewritten, Twilight will be rewritten. I'd be dropping her off in a paradox, it would tear her apart...

Will you tell Twilight about this ? And if you do Will she Accept it?
No!
I'm not going to put that on her!
Never!

As far as I know, this universe has become a bleeding universe. It's not affecting others, but multiple universes are leaking through and altering time here..
The strain could tear it apart..

Let's find that wretched pony that's been mutilating those unicorns and turn him into glue, dear Doctor!
Maybe we should investigate on the Unicorn Murders????
Look, serial murders happen all the time.
The time disruptions are way more important, alright?

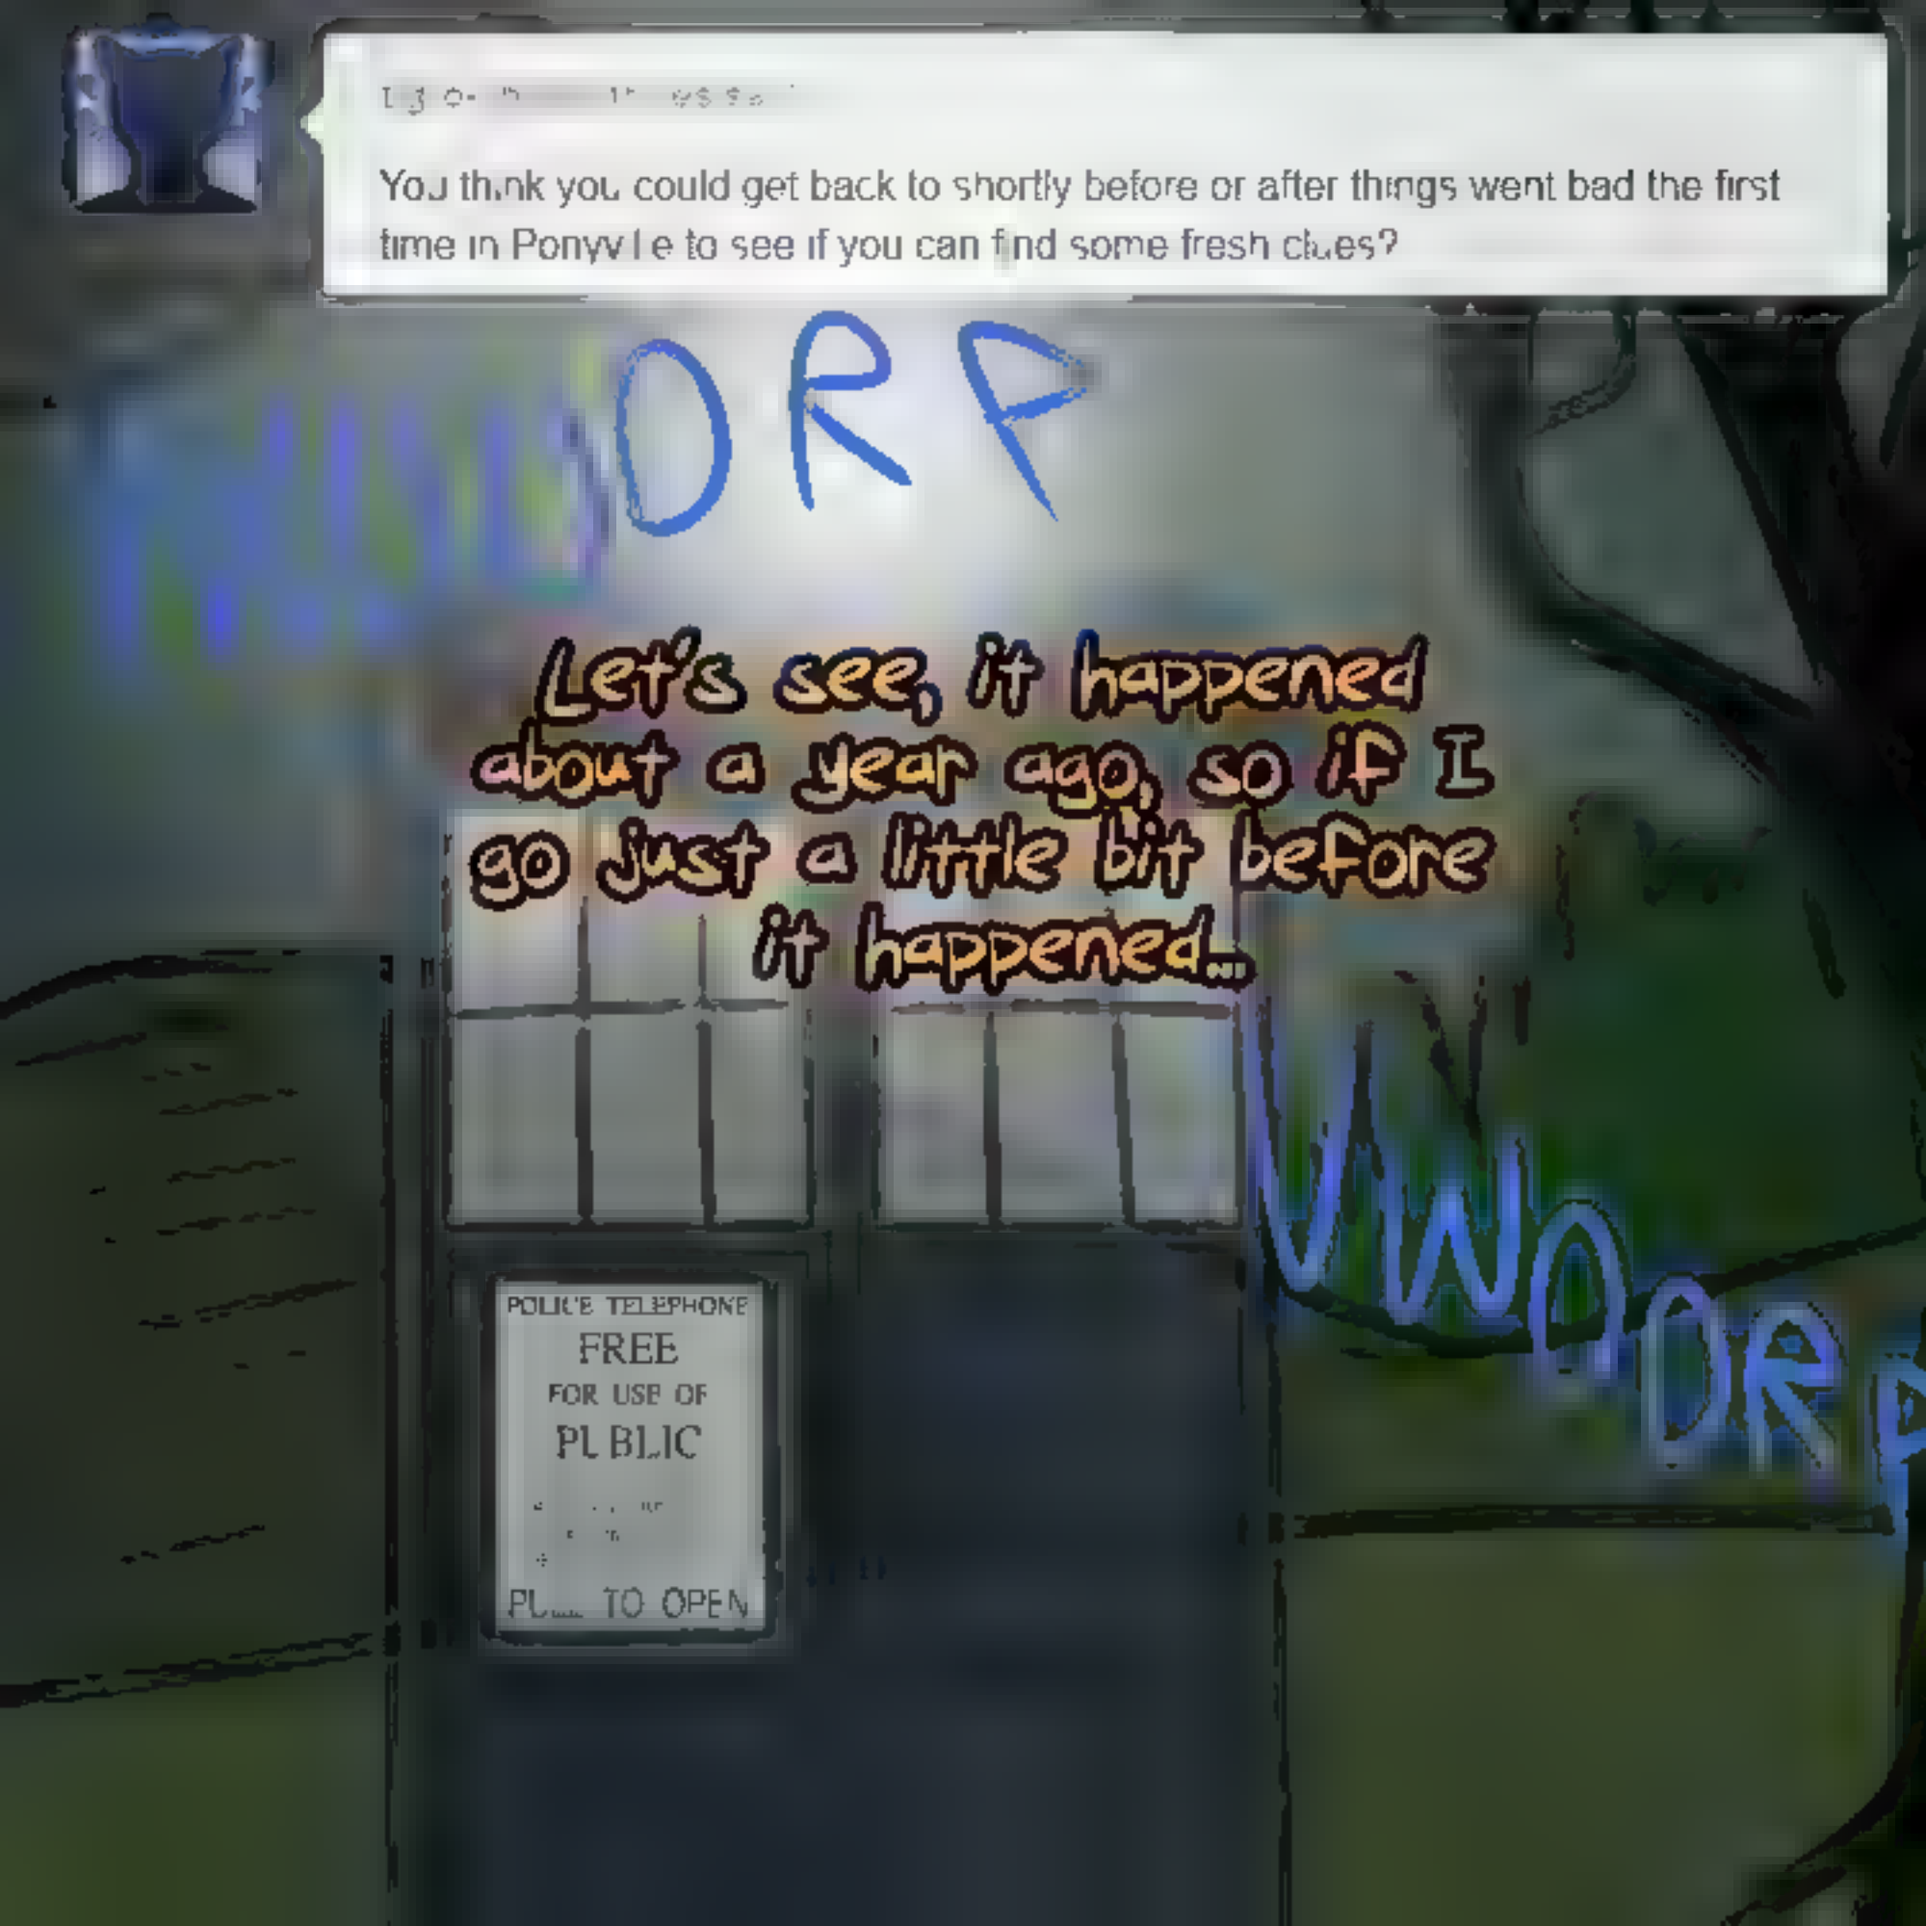
Can you retrieve any sort of evidence from the previous unicorn murders?
Say Doctor, have you gathered any more informations about those mysterious murders in Ponyville during these past days? I seriously hope you didn't forget about those. Any new clues?
Hey, Doc, heard anything new about those strange murders in Twilight's universe?
Do I LOOK like Sherlock Holmes to you?!

Doctor I suggest not looking nto the murders of the unicorns What if the murderer is somepony you can't stop?
Yes,
thank you, at least someone here is being logical!
More focus on time disruptions, less on bored sociopaths.

Fascinating. The timeline continues to sway with Twilight and her friends seeming y n apex to the und mensional events. Just a theory Doctor, but maybe you will have to deal with these eaks in reverse order of their timel ne occurence. Doing them in any other way may lead to further disruptions. Looks like Twilight is the first to be done
Reverse order... That's a good plan, I'll look for the start of the time disruptions. Let's see, what started it again...?

Wait! Doctor she said Rainbow Dash was dead Odd nyet?
Wait! Rainbow is dead?
Yes, according to Twilight she was murdered by Pinkie Pie.
Her and many other ponies.

Rainbow Dash? Dead? I think we're in way over our heads. But, that never stopped you before and that's not going to stop us either! Like Sherlock Holmes "Once you eliminate the impossible, whatever remains, no matter how improbable, must be the truth." Now let's go find that truth!
Seems like everything went downhill when Rainbow Dash died. Maybe that's something to look into. After all, you said it yourself. "time can be rewritten." Right?
Well would you look at that, apparently I'm doing a murder investigation after all.



You think you could get back to shortly before or after things went bad the first time in Ponyville to see if you can find some fresh clues?
Let's see, it happened about a year ago, so if I go just a little bit before it happened...

Star, the temporal rift is going haywire again.

Remember those guys who were watching you back last time you were in Ponyville? They might still be around. You should watch out for them. Avoid them if they show up again. You don't have a good history with large organisations stalking you. This could turn into another Torchwood, if you're not careful. I strongly suspect that these might be the ponies who fed information about you to the Punniverse night guard.
And this time we have confirmation. The Doctor was here.
I knew it.
